

## EPI | CORESTONE NATURE

We are extremely proud of our most recent innovation: "EPI Corestone Nature". Our passion to create beautiful design products for everyone has inspired this new product.

Corestone Nature is a powerful flooring system that combines the lively look of a cement floor and the strong properties of a cast floor. Corestone Nature distinguishes itself from a cement-bound floor because it does not crack by itself, is applied in 2 to 3 days and is available in approx. 36 standard colours including lighter colours.

### Features and benefits

- Seamless
- Application in 2 to 3 days standard
- Easy to clean and maintain
- Fluid-tight
- To be applied over tile floors (1 day extra)
- Completely solvent-free

- Increased UV stability
- Wear resistant
- No shrinkage cracks
- Only applicable indoors
- Skid resistance: R10-R12

### Suitable for all substrate floors

EPI Corestone Nature is very suitable for renovation projects. This system can be applied over a variety of substrate floors. It's many design options allow this floor to suit in any interior.

The floor feels comfortable and warm and - especially in combination with underfloor heating - is a pleasure to live on.

### Sustainable

In a world where sustainability is essential and design is becoming increasingly important, we have developed a product that has the natural appearance and structure of concrete as well as strong properties. An EPI Corestone Nature floor has an unbeatable average lifespan of forty years giving you a floor that lasts a lifetime. The floor is easy to keep clean, virtually maintenance-free and can be perfectly installed in combination with underfloor heating or over existing floors.

Corestone Nature is a natural design product that feels at home in any interior and can take the daily wear and tear. Whether you are looking for a floor for your home, shop, office or showroom, Corestone Nature offers endless possibilities.

The products are available in many colours, in both solid colours and in blend versions.

NATURE

Design and sustainability combined

For more information on EPI Corestone Nature,  
visit our website at [epidanmark.dk](http://epidanmark.dk).

### STRONG & DURABLE

Our unique system has strong properties, is wear resistant and very durable.

### ROBUST MATTE

A natural, cement-look appearance, with a matte finish. Applied by professionals using traditional techniques.

### NATURAL & SUSTAINABLE

Consists of 90% direct natural raw materials and is made with products from European A-Class suppliers.

## CORESTONE NATURE | ABOUT US

Our latest development is Corestone Nature, Corestone Classics' versatile brother. A matt cement-look floor available in different colors.

By applying the latest techniques, our research and development colleagues have succeeded in reducing the application time of this floor to 2 to 3 days. In comparison, a normal cast floor needs 5 days. Of course, this floor is fluid-tight, seamless, very durable and easy to keep clean.

The Corestone Nature floor can be applied on various surfaces, suitable for renovation and newbuild.

Whether it is a rural or industrial look you're after, this floor is where you start to bring together your own unique interior.

Corestone Nature's unique qualities are:

Stylish

Comfortable

Super Strong
